

Worm Egg Count Submission Form

Instructions for sample collection and transport

1. Please collect fresh droppings and use the sample container provided by our office.
2. Please refrigerate the sample. It is ok to refrigerate the sample overnight. Please transport the sample with an ice block to keep it cool. If the sample is kept at room temperature for too long, the eggs will hatch and the result will be affected. If the eggs hatch, the result will be lower than it actually is.
3. Please advise which day the sample will be delivered by calling our office on (03) 5977 5250. Alternatively, you are welcome to advise us via email using the address info@tevs.com.au.
4. Please complete and provide this form with your sample.
